SUMMARY

Product designer building KHOZNA, a rental platform tackling housing challenges for students and professionals moving to Nepal's cities. I combine UX/UI design with market research and business strategy — designing for real user problems while keeping revenue, retention, and growth in view.

SKILLS

Design & Product: Product Design, UX/UI Design, Wireframing & Prototyping, Interaction & Visual Design, UX Writing

Research & Strategy: User Research, Market Research & Validation, Product Strategy, Competitor Analysis, Entrepreneurship

Tools: Figma, Notion, Excel

Basic Development: HTML, CSS, Flutter, Vibe Coding / AI-Assisted Development (Antigravity)

EXPERIENCE

Founder & Product Designer — KHOZNA Feb 2025 – Present

Kirtipur, Kathmandu Valley

- Lead end-to-end UX/UI design — from wireframes to high-fidelity Figma prototypes — for a rental platform used by tenants and landlords across the Kathmandu Valley
- Conduct ongoing user research with renters and property owners to validate housing pain points and guide the product roadmap
- Design a trust-first experience centered on verified listings and real-time availability
- Build and test a full-stack web application — vibe-coded with AI-assisted tools like Antigravity — with early users in the Kathmandu Valley
- Apply market research and business strategy to prioritize features and shape product direction

UX/UI Designer & Product Developer — Self-Directed Learning Jun 2024 – Present

Kathmandu

- Took a self-directed gap year after +2 to build product design skills before starting BBS
- Mastered Figma; learned HTML and CSS fundamentals to build interactive prototypes
- Completed UX case studies and portfolio projects applying user research, wireframing, and competitor/market analysis to real business problems
- Built early connections within Nepal's design and startup community, laying the groundwork for KHOZNA
